

NAJNOVIJA RANG LISTA ISTRAŽIVAČA SRBIJE

Gyula Mester

University of Szeged, Szeged, Hungary

drmestergyula@gmail.com

Kratak sadržaj: Najnoviju rang listu istraživača Srbije prezentujemo primenom baze Google Scholar na osnovu h-indeksa istraživača. Ako dva ili više istraživača imaju isti h-indeks tada se rangiranje vrši prema broju citata na publikacije istraživača. Na prikazanoj rang listi prikazujemo 20 najbolje rangiranih istraživača. Prikazujemo i Orcid ID istraživača. Prvo poglavlje obuhvata Uvod, u drugom poglavlju prezentujemo najnoviju rang listu istraživača Srbije, treće poglavlje obuhvata Zaključke.

Ključne reči: najnovija rang lista istraživača Srbije, h-indeks, Google Scholar, citati, Orcid ID

THE LATEST RANKING LIST OF RESEARCHERS FROM SERBIA

Abstract: The latest ranking list of researchers from Serbia by h-index is presented using the Google Scholar database. When two or more researchers have the same h-index, the ranking is based on the citations to their articles. The ranking presents the top 20 researchers. We also present the Orcid ID number of the researchers. The first chapter is the introduction, in the second chapter we present the latest ranking list of researchers at Serbia, the third chapter is the conclusions.

Key Words: the latest ranking list of researchers from Serbia, h-index, Google Scholar, citations, Orcid ID

1. UVOD

Rad prezentira najnoviju rang listu istraživača u Srbiji. Naučnometrija prezentuje ukupan broj publikacija, broj publikacija u časopisima sa impakt faktorom, broj citata na publikacije, h-indeks i g-indeks istraživača. Rang listu istraživača prvenstveno prezentujemo prema h-indeksu. Istraživač ima indeks h ako od ukupnog broja njegovih radova, h radova ima najmanje h citata. h-indeks se može odrediti iz sledećih baza podataka: Web of Science, Scopus, Google Scholar i programom Publish or Perish [1-10]. U slučaju ako se h-indeks dva ili više istraživača poklapaju, tada rangiranje vršimo prema broju citata na radove istraživača.

Na rang listi prikazujemo 20 najboljih istraživača u Srbiji sa minimalnim h-indeksom 61. Rang listu smo prezentovali primenom baze Google Scholar. Google Scholar startovao 2004 god., i prikazuje publikacije, citate i h-indeks istraživača. Publikovanje naučnih rezultata je najvažniji aspekt naučnih istraživanja. Naučnometriju nephodno aplicirati za kvantitativnu i kvalitativnu ocenu rezultata naučnih istraživanja [11-19]. Struktura rada obuhvata sledeća poglavlja: 1. Uvod, 2. Najnovija rang lista istraživača Srbije, 3. Zaključak, 4. Literatura.

2. NAJNOVIJA RANG LISTA ISTRAŽIVAČA SRBIJE

Najnoviju rang listu istraživača u Srbiji prezentujemo primenom baze Google Scholar na osnovu h-indeksa istraživača. Ako dva ili više istraživača imaju isti h-indeks tada se rangiranje vrši prema broju citata na publikacije istraživača. Na prikazanoj rang listi prikazujemo 20 istraživača, minimalna vrednost h-indeksa je 61. Prikazujemo i Orcid ID istraživača [20-32].

3. ZAKLJUČAK

Rad prikazuje najnoviju rang listu 20 najbolje rangiranih istraživača u Srbiji. Rang listu prezentiramo prema h-indeksu istraživača. u slučaju ako dva ili više istraživača imaju isti h-indeks, rangiranje vršimo prema broju citata. Rang listu prezentujemo primenom baze Google Scholar. Minimalni h-indeks istraživača na rang listi je 61, prikazali smo i Orcid ID istraživača. Autor rada je mišljenja da je vrlo značajno prikazati rang listu 20 najbolje rangiranih istraživača Srbije. Prvi i drugi i treći istraživači predstavljaju istaknute istraživače i u međunarodnim okvirima.
